JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

BOOK REVIEWS

METHODS AND PRINCIPLES

Introduction to the Science of Sociology. ROBERT E. PARK and ERNEST W. BURGESS. The University of Chicago Press, 1921. XXI, 1040 pp. \$4.50 net.

This comprehensive and, in spite of the number of pages, quite portable volume is a source-book that will undoubtedly prove of considerable value to teachers of sociology. The method of selecting short and pregnant passages seems excellent since it permits the assemblage of a great variety of distinct points of view under a single cover. Each chapter is furnished with an introduction by the compilers, as well as by a selected bibliography, topics for themes, and questions for discussion. Experience seems to prove that even the most rigorously historical attitude toward social phenomena can not long remain wholly free from an attempt to formulate the processes involved in the events studied. Accordingly, anthropologists will do well to acquaint themselves with the views of men like Sumner and Hobhouse, Durkheim and Simmel. Even where they may feel inclined to doubt or qualify, they will derive stimulation, possibly leading to a more adequate formulation; and certainly the book before us will be of the greatest value in showing them the scope and character of recent sociological thought.

ROBERT H. LOWIE

NORTH AMERICA

Indian Village Site and Cemetery near Madisonville, Ohio. By EARNEST A. HOOTON and C. C. WILLOUGHBY. Papers of the Peabody Museum of American Archaeology and Ethnology, Harvard University. Vol. VIII.—No. 1. 1920

Dr E. A. Hooton and Mr. C. C. Willoughby in this publication describe the results of eight years excavation of a prehistoric Indian village site and cemetery near Madisonville, Ohio. The exploration was carried on intermittently from 1879 to 1911. It is a timely contribution to the field of Ohio archaeology and adds considerable information regarding the Fort Ancient culture.
